(54) Title: CLIPBOARD ORGANIZER FOR DATA ACQUISITION

(57) Abstract: A portable writing board organizer with storage space and a handle, providing ready access to a computer, a laser distance measuring device, a scope, a camera, a GPS unit, a tripod, a tape measure, a ruler a divider tray, and a clipboard. The clipboard organizer is ideally suited for use in the field in the areas of real estate, especially appraisal of real estate, surveying, construction, and engineering. The computer can have sketching and appraisal software. The laser measuring device in conjunction with a scope allows accurate electronic measurement of land, buildings, and related structures, and the data thus acquired can be stored and processed in the computer. The appraisal software utilizes this field data to generate appraisal reports, but the computer can also generate reports related to other specialties. Because the board-like organizer is the size and shape of a clipboard it is light weight and can be carried easily in one hand.
